# MICADO - Migrant Integration Cockpits and Dashboards

*How to improve the management of
migrant integration into host communities?*

*How to facilitate the opportunities for
migrants to participate in society?*

*How to build up capacity for responding to future migration
challenges on institutional and individual levels?*

**MICADO aims to facilitate the exchange between migrants,
public authorities and engaged civic society and ease migrants'
access to regular social systems (housing, education, health
care, and labour) and counselling services through attractive
digital services. Thus, it will lower the socio-economic effort
and expenditure in migrant integration, both for host
economies and individuals.**

MICADO is an **interdisciplinary international project** that involves
research institutions, public authority agencies and SMEs from
Germany, Belgium, Italy, Spain and Austria, whose purpose is to
co-develop a MICADO-"one-fits-all"-solution (generic solution)
that can be adapted by the local actors to their respective local
challenges and manage migration issues with a **local solution:**

General analysis   **Local analysis**

Generic solution   **Local solution**

The generic solution will first be piloted in the MICADO-partner
cities Hamburg, Bologna, Madrid and Antwerp, and will
then eventually be modified by the local actors. The outcome of
the project will **empower public authorities and helpers'
communities** that attend migrants and refugees from their
moment of arrival in the EU with more efficient and more effective
digital services. It will also **support migrants and refugees** by
enabling essential communication, orientation, and navigation
within their new life environments.

Eventually, the MICADO solution shall be offered on an open
source platform and be transferable to communities in other
European cities.
